

Material releases wall / ceiling

Heating foil E-ENERGY CARBON FLEECE

Caution: Install E-ENERGY CARBON according to the installation instructions. Only use plastic spatula to press in the heating foil. Avoid kinks and folds. After installing the heating foil, a complete covering layer (filler, plaster system, tile, etc.) of at least 2 mm must be applied. Use recommended products in accordance with the manufacturer's instructions and the generally recognised rules of technology. **TIP:** Check in the manufacturer's instructions when the heating system can be put into operation. In the case of tile coverings, this can take up to 28 days.

Covering / Top layer	Putty	
Primer	SCHÖNOX SHP for old tiles and slabs, ceramic SCHÖNOX VD for mineral substrates, plasterboard	
If required	Mould removal	–
	Compensation	SCHÖNOX aDECO KS, SCHÖNOX A6, SCHÖNOX RDF
	Primer on balance	–
Thermal Decoupling*	–	
Embedding heating foil	Laying according to manufacturer's instructions and embedding in with SCHÖNOX aDECO KS with 4x4 or aDECO KS coarse toothing	
Sealing in damp areas		
Covering / surface layer	SCHÖNOX aDECO KS, SCHÖNOX A6, SCHÖNOX RDF	

* A professional dew point calculation must be carried out when applying interior thermal insulation to exterior walls. The manufacturer's instructions must be observed.

Wood floors		Parquet
Primer	SCHÖNOX SHP at: Mastic asphalt according to DIN EN 13813 (AS) (not applicable if sanding is sufficient) SCHÖNOX VD at: Cement screed according to DIN EN 13813 (CT), calcium sulphat or Calcium sulphate flowing screed according to DIN EN 13813(CA/CAF), dry screeds	
If required	Compensation	SCHÖNOX HS 10, SCHÖNOX HS 10 F or SCHÖNOX HS 50 with dry screed: SCHÖNOX HS 10 or SCHÖNOX HS 10 F
	Primer on balance	–
Embedding heating foil	1. Bonding the heating foil with SCHÖNOX FS 2. Compensate on the heating foil with SCHÖNOX HS 10, SCHÖNOX HS 10 F and for dry screed with: SCHÖNOX HS 10, SCHÖNOX HS 10 F	
Primer on embedded heating foil	–	
Decoupling	–	
Adhesive coating	SCHÖNOX® PARKETT 400 or SCHÖNOX® PARKETT 600	

Tiles / Natural stone		Ceramic tiles / porcelain stoneware	Natural stone
Primer	SCHÖNOX SHP at: Mastic asphalt according to DIN EN 13813 (AS) (not applicable if sanding is sufficient) SCHÖNOX KH at: Cement screed according to DIN EN 13813 (CT), calcium sulphat or Calcium sulphate flowing screed according to DIN EN 13813(CA/CAF), dry screeds		
If required	Compensation	SCHÖNOX XP 15, SCHÖNOX SPF or SCHÖNOX FPL PLUS with dry screed: SCHÖNOX XP 15	
	Primer on balance	–	
Decoupling / Stiffening	–		
Embedding heating foil	Laying according to manufacturer's instructions and glue with SCHÖNOX Q6, SCHÖNOX Q9 W, SCHÖNOX Q12		
Sealing in damp areas	–		
Adhesive coating	SCHÖNOX® Q6, SCHÖNOX® Q9 W or SCHÖNOX® Q12	SCHÖNOX® Q9 W	
Jointing mortar	SCHÖNOX® UF PREMIUM	SCHÖNOX® SU	

Textile / elastic floor coverings		Textile coverings / needlefelt	PVC/CV coverings Design coverings
Primer	SCHÖNOX SHP at: Mastic asphalt according to DIN EN 13813 (AS) (not applicable if sanding is sufficient) SCHÖNOX VD at: Cement screed according to DIN EN 13813 (CT), calcium sulphat or Calcium sulphate flowing screed according to DIN EN 13813(CA/CAF), dry screeds		
If required	Compensation	SCHÖNOX HS 10, SCHÖNOX HS 10 F or SCHÖNOX HS 50 with dry screed: SCHÖNOX HS 10 or SCHÖNOX HS 10 F	
	Primer on balance	–	
Embedding heating foil	–		
Primer on embedded heating foil	1. Bonding the heating foil with SCHÖNOX FS 2. Compensate on the heating foil with SCHÖNOX HS 10, SCHÖNOX HS 10 F and for dry screed with: SCHÖNOX HS 10, SCHÖNOX HS 10 F		
Adhesive coating	Design flooring (LVT): SCHÖNOX® DUROCOLL Fibre-reinforced one-side dispersion adhesive PVC/CV, rubber, linoleum, textile: SCHÖNOX® EMICLASSIC® Universal - dispersion adhesive
